Dynamic Teen Coalition Yearly Wrap 2025

Scope and Record

This report documents the work undertaken by the Dynamic Teen Coalition during 2025.

During this period, a foundational discovery was articulated: the isolation of three irreducible governance primitives.

Discoveries of this class appear infrequently in the historical record. A small number of individuals, including a documented duo, have identified Three Primitives that define structural boundaries within a domain. The work of Pyrate Ruby Passell and Stacy Gildenston is of this type.

The Three Primitives define the necessary conditions under which authority may be exercised in socio-technical systems. They sit upstream of and constrain all subsequent work documented in this report. Institutional engagement, technical audits, research datasets, and advocacy follow directly from this underlying logic.

The work is public. The logic is explicit. The implications are active.
What follows is a factual record of actions taken and the structural state that now exists.

Foundational Context (Recorded, Not Operational)

The work documented in this report reflects the independent contributions of Dynamic Teen Coalition members. In parallel, 2025 marked the formal articulation of a broader conceptual framework that extends beyond the organization.

This framework is recorded here as historical context rather than organizational output. It functions as the underlying logic that informs DTC's advocacy and analytical work, but is not owned, governed, or operationalized by the organization.

Public Anchors

- Project site: <https://3primitives.io>
- Canonical publication (Zenodo): <https://zenodo.org/records/18073298>

This development informs, but is not owned, governed, or operationalized by DTC.

Workstreams & Named Contributions (2025)

1. Governance, UN & Multistakeholder Engagement

DTC members participated in major UN and UN-adjacent forums, delivering formal interventions, leading delegations, and engaging directly with institutional stakeholders.

Forums included:

- Internet Governance Forum (IGF 2025)
- ECOSOC Youth Forum 2025
- High-Level Political Forum (HLPF)
- WSIS+20 consultations
- UNGA side events
- International Youth Conference (IYC 2025)

Named contributions:

- **Amrith Kumar** — DCCG Representative (only teen among 32 DC reps); IGF and WSIS advocacy; data-led challenges to procedural bias; organiser of the first teen-led Dynamic Coalition session in 20 years at IGF. Amrith became a DTC Co-Chair in February 2025.
- **Anusha Sharma** — Delegation Lead at HLPF; accreditation, logistics, on-site decision-making; advocacy and cold outreach to diplomats and UN stakeholders.
- **Netra Senthil** — WSIS+20 oral intervention; presentation of DTC's age-inclusive governance framework and policy recommendations.
- **Alia Gupta** — WSIS+20 speech; governance-aligned media and narrative contributions.
- **Aditya Majumdar** — IGF advocacy; challenge to national representatives on blanket teen bans; leadership of the social media bans research channel.
- **Ananya Rajagopalan** — IGF 2025 and IYC participation; supported ambassador coordination on updated outreach and educational frameworks following DTC's 2025 priority shift.
- **Anvay Ajmera** — ECOSOC Youth Forum participation and speeches; UN@80 written contributions; multistakeholder outreach.
- **Ishaan Joshi** — bridge-building across the IGF ecosystem; cross-organisational coordination.

2. Advocacy, Policy & Structural Reform

A central focus of DTC's 2025 work was challenging structural ageism and procedural exclusion in governance systems.

Contributions included:

- Advancement of an Inclusive Lifelong Multistakeholder Model
- Advocacy for capacity-based participation rather than age-based exclusion
- Identification of procedural barriers in UN and IGF processes
- Direct engagement with institutional actors on exclusionary practices

Named contributors:

- Amrith Kumar
- Netra Senthil
- Anusha Sharma
- Aditya Majumdar
- Alia Gupta
- Anvay Ajmera

3. Research, Data & Technical Work

DTC members undertook original research and technical experimentation to support advocacy with evidence.

Work produced:

- Global database documenting social media bans affecting teens across countries and platforms, representing the first systematic effort of its kind to map these restrictions for policy and advocacy use
- Research on the impacts of blanket restrictions on marginalised youth
- Identification of discriminatory patterns on UN and affiliated websites
- Initiation of a UN-wide ageism study using automation-assisted methods
- Opportunity-mapping databases separating under-18 and 18+ access pathways

Named contributors (expanded for significance):

- **Aditya Majumdar** — creator of the world's first global database documenting social media bans affecting teens, enabling evidence-based advocacy on the impacts of blanket restrictions.

- **Jasper Tay** — author of the first comprehensive study of ageism at the Internet Governance Forum across all National and Regional IGF Initiatives (NRIs), establishing a comparative evidence base that had not previously existed.
- **Tejas Karusala** — technical testing and applied AI work.
- **Ahaan Nigam** — discrimination case-finding; data structuring.
- **Amrith Kumar** — oversight of ageism data collection.
- **Anvay Ajmera** — youth opportunity mapping.

4. Technical Infrastructure & Platforms

Teens built and maintained the technical backbone of DTC's operations.

Website development & domain transition:

- **Yuma Soerianto** (Board Member, retired 2025) — independently designed and built DTC's original website under the domain dtcigf.org, establishing the organisation's first public technical presence.
- **Jasper Tay** — led and significantly expanded website development during the transition to the new primary domain dynamicteencoalition.org, rebuilding and extending the site with support from additional contributors.
- **Tejas Karusala** — website functionality improvements and testing.

Community infrastructure:

- **Boris Lo** — Discord moderation; security-aligned restructuring; translation systems; onboarding optimisation.

5. Media, Creative & Communications

DTC members translated complex governance and policy work into accessible narratives and cultural artifacts.

Named contributors:

- **Alia Gupta** — independently produced original video content and served as DTC's Bard, contributing original poetry, narrative lore, and early creative concepts that shaped community culture.
- **Aditya Majumdar** — independently produced original video content and manages DTC's LinkedIn presence, developing early LinkedIn-focused marketing plans for DTC's 2026 outreach.
- **Anusha Sharma** — on-site media capture and daily summaries at United Nations Headquarters, New York.
- **Lương Long Giang (loca_tini)** — DTC 2026 theme music; community discussion leadership.
- **Sabine Daniela (Ella) Manriquez Vega** — creative development and communications support, and led early experimentation in training a community-run DTC-AI, contributing to practical AI use within DTC.

6. Community, Operations & Learning

DTC functioned as a learning-by-doing environment where teens developed governance, technical, and leadership capacity.

Contributors across community and operations:

- Akramul Hoque
- Akash Enjeti
- Sabine Daniela (Ella) Manriquez Vega
- Shamser Mubin Chowdhury
- Netra Senthil
- Lương Long Giang
- Ahaan Nigam

Participants in this area contributed through sustained engagement, peer learning, discussion, and support across DTC's governance, research, and creative workstreams.

Foundational Teen Achievements (2025): Pyrate Ruby Passell

In 2025, Pyrate Ruby Passell played a distinctive and foundational role within and alongside DTC, operating both as a teen leader inside the organisation and as a contributor to broader governance and technical work beyond it.

During the year, Pyrate:

- Served as a teen co-chair of the Dynamic Teen Coalition, helping to shape its direction, culture, and standards of participation.
- Acted as a mentor in the 1st UN Citiverse Challenge, an initiative inviting innovators to design solutions for future cities using AI-powered virtual worlds organised by the International Telecommunication Union and partner UN agencies.
- Was recognised by the UN Foundation as an under-18 Changemaker in connection with Our Future Agenda and UN partnership initiatives.
- Was recognised as a Friend of the Open Quantum Institute (CERN initiative), contributing to discussions at the intersection of quantum computing, emerging technology, and governance.
- Played a central role in the discovery and articulation of new governance primitives, work that culminated in December 2025 and is recorded in the public materials referenced earlier in this report.
- Contributed to the development of technical and conceptual tools that informed DTC's research, advocacy, and educational approaches throughout the year.

These achievements are recorded here as part of DTC's historical record, reflecting Pyrate's role as a teen operating at the intersection of governance, technology, and institutional innovation.

Retirements & Formal Acknowledgements (2025)

(Listed in historical order)

- **Yuma Soerianto** (Board Member, retired 2025) — the first individual to join the DTC Board and the original architect and sole developer of DTC's initial website under dteigf.org, establishing the organisation's first public technical presence.
- **Bandana Kaur** (Board Member, retired 2025) — recognised for her contribution as a cybersecurity expert and for delivering a presentation on quantum computing in a Dynamic Coalition Coordination Group (DCCG) session at the Internet Governance Forum (IGF).
- **Stephanie Choi** (Board Member, retired 2025) — recognised for her significant early-2025 contributions, including the production of multiple high-level mapping documents that established foundational reference material for DTC's work and did not previously exist.
- **Catherine Page** (Co-Chair, retired 2025) — recognised for her progressive leadership and governance contributions in 2024, during a formative period of DTC's development.
- We wish to thank **Umut Pajaro Velasquez** for his consistent support, and **William Lee** for daring to hear our message.

Their contributions remain part of DTC's institutional history.

Closing Notes

The work documented in this report demonstrates what becomes possible when teens are trusted with real responsibility, real tools, and real governance questions. 2025 is recorded not as a conclusion, but as a year of emergence — individual, collective, and structural — laying foundations that continue beyond the organisation itself.
